Course content	During this semester various aspects of nutrition and/or health will be taught. For instance basic nutrition, nutrition across lifespan, nutrition and chronic diseases, nutrition policy, physical activity and obesity. The student will practice with advising and consulting an individual lifestyle, with a main focus on nutrition. Furthermore, the student will develop a group intervention to promote healthy food and lifestyle
Lecturer(s)	Kris Zwemmer - kristiaan.zwemmer@inholland.nl
Learning outcomes	<p>Nutrition 1:</p> <p>Basic Nutrition and Nutrition across lifespan – 5EC</p> <p>During this course students will learn about nutrition and biochemistry. We will discuss nutrients, nutrition and health, nutrition and obesity, energy demand and requirements, digestion, physiology, healthy nutrition, nutrition and physical activity. We also pay attention to subjects that are relevant to specific age groups; nutrition across lifespan with regards to, children, adolescents, employees, elderly, pregnant woman et cetera. Specific nutritional themes for these groups will be discussed in relation to healthy nutrition.</p> <p>Individual consultation – 9EC</p> <p>During this course students will learn how to coach an individual client on nutrition, physical activity and healthy lifestyle in general. Skills like performing an intake, testing and counseling will be practiced in a practical and theoretical way. Students will be offered basic knowledge of concepts related to sports and nutrition, diets and nutritional assessment, evidence based practice.</p> <p>Nutrition 2:</p> <p>Nutrition policy and Nutrition and chronic diseases – 5EC</p> <p>During this course students will learn about the different policy strategies in Europe in relation to nutrition and healthy lifestyle. In small groups students will find out how governments try to cope with the problem of overweight and</p>

	<p>obesity. Students also learn about nutrition and chronic diseases e.g. obesity, diabetes, cancer, et cetera.</p> <p>Nutrition intervention plan – 9EC</p> <p>During this course students will learn how to develop, execute and evaluate a nutrition intervention plan for a specific target group. Skills with regard to physical activity, nutrition and assessment, personal coaching, health counseling, motivational interviewing, and research will be offered in a practical and theoretical way.</p> <p>Electives – 2EC</p> <p>Electives will contribute to the development of competences that are useful for completing the programme, for example cultural and language competences.</p>
