

Bring Your Own Device (BYOD) - Inholland University of Applied Sciences

At Inholland, you'll use digital tools every day—for classes, group projects, assignments, and collaboration with fellow students. That's why it's important to start your studies with a **suitable laptop** that can run the applications required for your programme.

This document outlines the **minimum specifications** your laptop must meet.

Minimum laptop specifications for Year 1 and 2

- **Processor (CPU):** Intel Core i5 (10th generation) or equivalent/higher (AMD also acceptable)
- **Memory (RAM):** 8 GB or more
- **Storage:** SSD with at least 250 GB capacity
- **Audio & Video:** Built-in webcam, microphone, and speakers (or a headset)
- **Ports:** HDMI port
- **Recommended:** USB Type-C port (Gen 2)

 Chromebooks and tablets (such as iPads) are not suitable. These devices do not support the required software.

Additional requirements for certain specialisations (Year 3 and 4)

If you choose a specialisation such as **Data & AI** or **App Design & Development**, you'll need a more powerful laptop:

- **Memory (RAM):** At least 32 GB

Operating system: our recommendation

We **recommend using a laptop with Windows**.

Prefer to use **Linux** or **macOS**? That's possible—but keep in mind that you may need to use a **Virtual Machine (VM)** to run certain Windows-based applications. This requires additional technical skills and may be less user-friendly.

Access to Inholland's digital learning environment

With your laptop, smartphone or other device, you'll have access to Inholland's digital learning environment, which is specifically designed to support your learning process. As a student, you can use:

- **Office 365** (free for students)
- **Moodle** (for course materials and assignments)
- The **digital library**
- Inholland's intranet: **Iris**

Looking for a (new) laptop? Benefit from student discounts!

About to purchase a (new) laptop? Great news!
